Solar System Mobile

Children can color the planets, and then link them together to create their own solar system. Can you remember the order? Starting from the Sun: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.

You'll need:

- Solar System template printed out; heavy paper may hold up better
- Crayons or colored pencils
- 9 Paper clips
- Hole punch
- Scissors
- Yarn or string

What to do:

1. Color in the sun and planets of the solar system.
2. Cut out the sun and the planets, be sure to leave the tabs on for stringing them together.
3. Use a hole punch or scissors to cut out the holes on the tabs.
4. Bend the paper clips in to "S" shapes to link the planets together.
5. Use string or yarn to hang up the solar system.
