## Nature Scavenger Hunt

The forest is filled with colors. In this activity, little ones will be searching for a variety of colors in nature. If you don't live near a forest, try exploring a neighborhood park, your backyard, or even your own home.

### You'll need:

- Scavenger hunt sheet
- Scissors
- Egg carton, bin, or tray
- Tape

### What to do:

1. Use an egg carton or other bin to hold the items.
2. Cut out the colors and items from the scavenger hunt sheet. Can you name all the colors?
3. Tape the cutouts to the egg carton.
4. Find a natural area to explore. Be sure to check if collecting plants is okay before you gather items. Can you find something for each color? Is it easier to find a certain color in nature? Which color do you like best?
