

Volcano Art

Now that you've learned all about volcanos and how they erupt, you can create your own volcano craft!

Materials needed:

- Paper
- Scissors
- Glue stick or tape
- Cotton balls
- Markers, crayons, or colored pencils

What to do:

1. Draw the outline of a volcano on a piece of paper, like a triangle with the top cut off. (It's OK to get help from an adult for this part.)
2. Use crayons, markers, or colored pencils to color in your volcano and draw lava running down the sides of it.
3. Take a glue stick and attach cotton balls to be the ash coming out of your volcano.
4. Use the scissors to carefully cut out your beautiful volcano.
5. Display it in your home!

Share your volcano craft! Post a picture on social media and tag the museum.
